AtliQ Grands

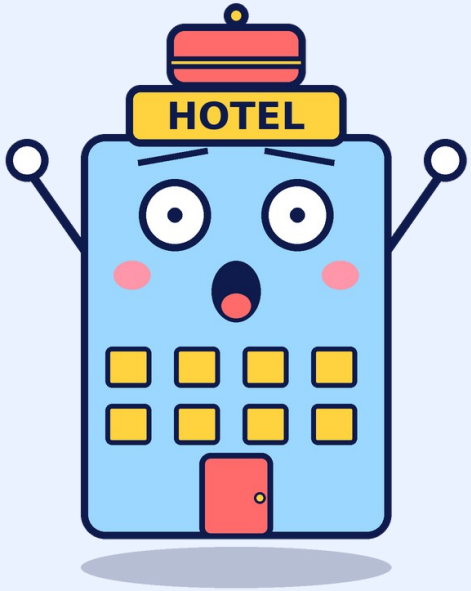

The Hotel Data Comic

How Business & Data Intelligence can win back market share and revenue

Metrics • Dashboard • Insights

The Problem

We are losing market share and revenue in luxury & business hotels - and we have NO in-house analytics team!

20 years
in the hospitality industry

Five-star
hotels across India

Losing ground
rivals move fast, decisions lag

Plan: hire a 3rd-party analyst (us!) to turn history into decisions

Our Mission: 3 Tasks

3

1

Create metrics

Turn the metric list into reusable DAX measures: revenue, occupancy, rating, cancellations.

2

Build the dashboard

Follow the stakeholder mock-up: KPI cards, city / platform / property views, filters.

3

Find new insights

Go beyond the brief: cancellation leakage, channel mix, weekend skew, hotel report card.

Deliverable: a Power BI report - Overview, Monthly, About

What Data We Need

dim_hotels

property_id, property_name, category, city

dim_rooms

room_id, room_class

dim_date

date, mmm yy, week no, day_type

fact_bookings

One row per booking: booking_id, property_id, booking_date, check_in_date, checkout_date, no_guests, room_category, booking_platform, ratings_given, booking_status, revenue_generated, revenue_realized

fact_aggregated_bookings

Daily capacity: property_id, check_in_date, room_category, successful_bookings, capacity

Typical AtliQ dataset - rename to match your model

Metric Queries: The Basics

Metric	DAX query	Output
Revenue	`Revenue = SUM(fact_bookings[revenue_realized])`	Rs 573.2M
Total Bookings	`Total Bookings = COUNT(fact_bookings[booking_id])`	45,129
Total Capacity	`Total Capacity = SUM(fact_aggregated_bookings[capacity])`	about 78K
Occupancy %	`Occupancy % = DIVIDE(SUM(fact_aggregated_bookings[successful_bookings]), [Total Capacity])`	59%
Average Rating	`Average Rating = AVERAGE(fact_bookings[ratings_given])`	3.62

Tip: base measures first, then reuse them so every KPI stays consistent

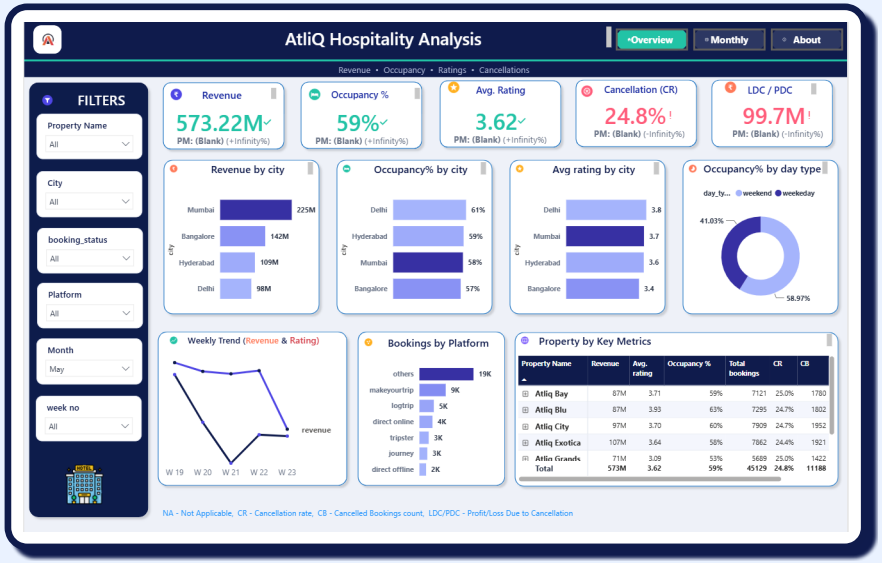

Metric Queries: Smart Ones

Metric	DAX query	Output
Cancelled Bookings	`CALCULATE([Total Bookings], fact_bookings[booking_status] = "Cancelled")`	11,188
Cancellation %	`DIVIDE([Cancelled Bookings], [Total Bookings])`	24.8%
Revenue PM	`CALCULATE([Revenue], DATEADD(dim_date[date], -1, MONTH))`	Jun: Rs 573.2M
Revenue MoM %	`DIVIDE([Revenue] - [Revenue PM], [Revenue PM])`	Jun -1.5%, Jul -11.6%
NEW RevPAR	`DIVIDE([Revenue], [Total Capacity])`	about Rs 7.3K
NEW Weekend share	`DIVIDE(CALCULATE(SUM(fact_aggregated_bookings[successful_bookings]), dim_date[day_type] = "weekend"), SUM(fact_aggregated_bookings[successful_bookings]))`	59%

Yellow rows = extra measures we added. LDC/PDC (profit/loss due to cancellation) stays as defined in the report.

The Output: Our Dashboard

Page 1 Overview: KPIs, city, platform, property

Page 2 Monthly: month slicer, capacity, weekdays

All visuals react to the 6 filters on the left

May: The Baseline

Revenue	573.2M	first month
Occupancy	59%	first month
Avg rating	3.62	first month
Cancel (CR)	24.8%	first month
LDC / PDC	99.7M	first month

Baseline month: Rs 573M revenue, 59% occupancy, 24.8% cancellations

June: A Slight Slip

Revenue	564.8M	PM 573.2M (-1.48%)
Occupancy	58%	PM 59%
Avg rating	3.61	PM 3.62
Cancel (CR)	25.1%	PM 24.8%
LDC / PDC	99.9M	PM 99.7M

Slight slip: revenue -1.5%, occupancy -1 point, cancellations creep up to 25.1%

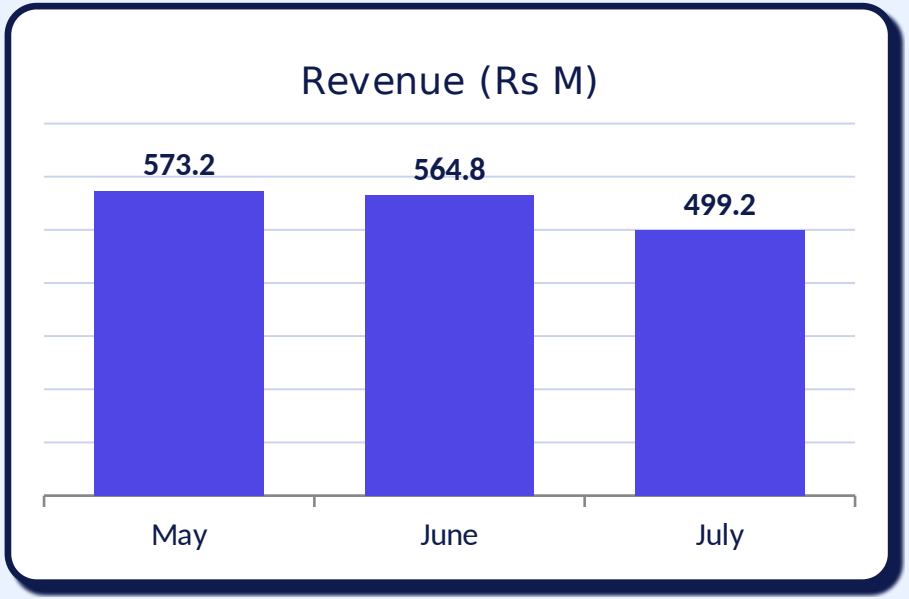

July: The Big Drop

Revenue	499.2M	PM 564.8M (-11.61%)
Occupancy	57%	PM 58%
Avg rating	3.62	PM 3.61
Cancel (CR)	24.4%	PM 25.1%
LDC / PDC	85.9M	PM 99.9M

Biggest drop: revenue -11.6%, but cancellations improve to 24.4% and LDC falls to Rs 85.9M

Month by Month: Revenue Slides

Occupancy

59 > 58 > 57%

Cancellation

24.8 > 25.1 > 24.4%

Avg rating

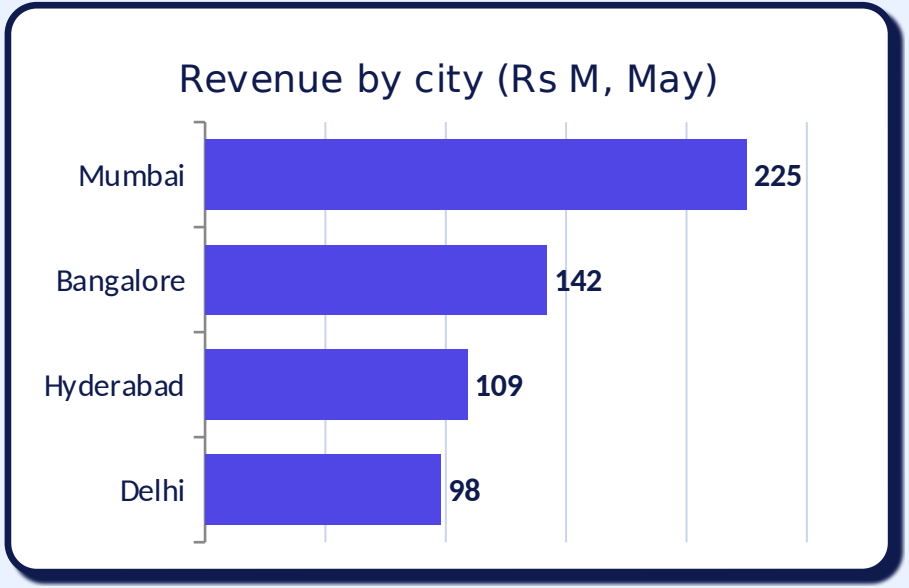

3.62 > 3.61 > 3.62

LDC / PDC

99.7 > 99.9 > 85.9M

Revenue fell 12.9% from May to July, but occupancy slipped only 2 points: the loss looks like price and mix, not empty rooms (to verify)

Insight 1: Cities Tell Tales

Mumbai: the cash cow

39% of revenue (Rs 225M)

Delhi: the hidden gem

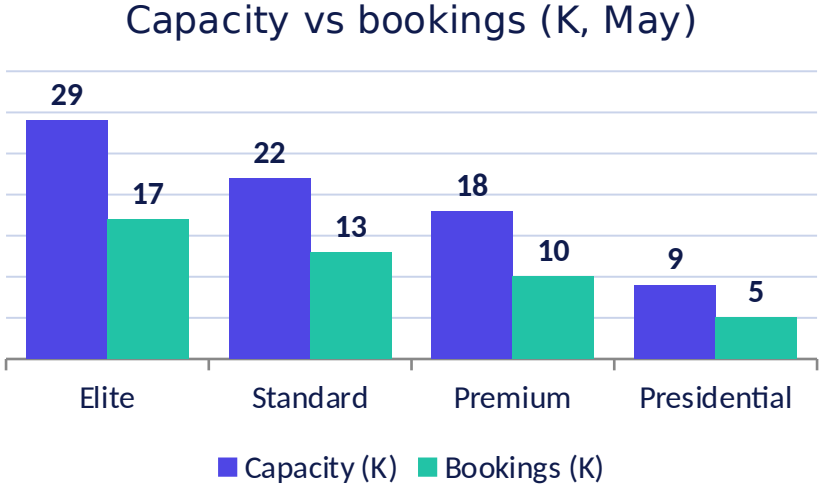

Lowest revenue, yet best occupancy (61%) and rating (3.8)

Bangalore: needs love

Lowest rating (3.4) and occupancy only 57%

Action: protect Mumbai, test higher rates in Delhi, fix guest experience in Bangalore

Insight: Room Class Fill

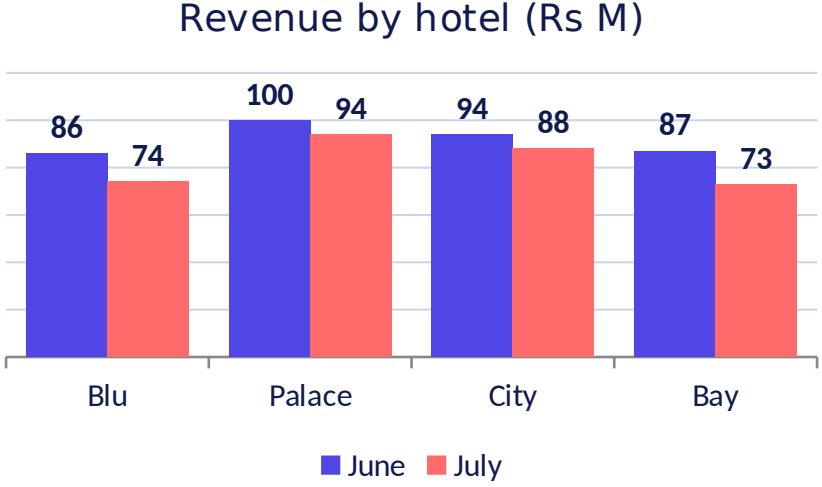

~56-59% utilisation in every class (Elite 59%, Presidential 56%)

9K vs 5K Presidential rooms: only 5K of 9K capacity booked

July: down cancellations fell in every class (Standard 3.3K to 2.7K)

Empty rooms are spread across every class: use dynamic pricing and upgrade offers, not one-class fixes

Insight: Hotels June vs July

Bay -16%, Blu -14%

biggest July drops (87 to 73M, 86 to 74M)

City, Palace -6%

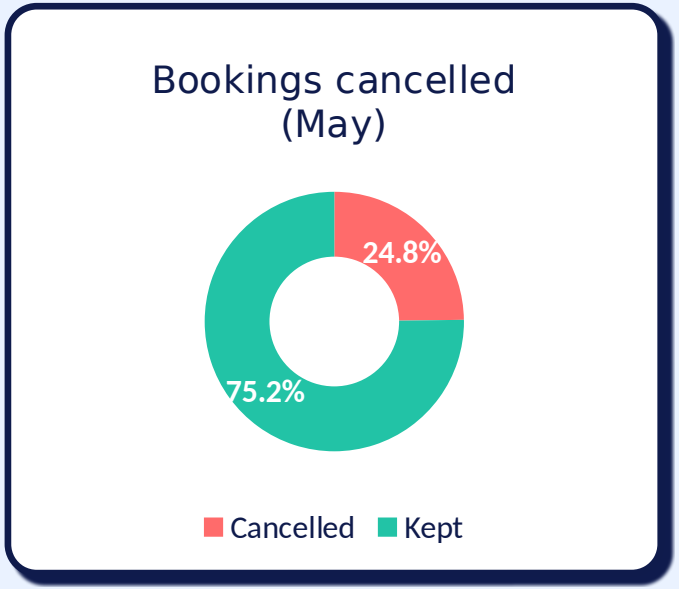

smaller drops (94 to 88M, 100 to 94M)

Occupancy flat

Blu 62% and Bay 58% in both months

July revenue fell with no occupancy change in Bay and Blu: again points to price, not footfall

Insight 2: Cancel Culture

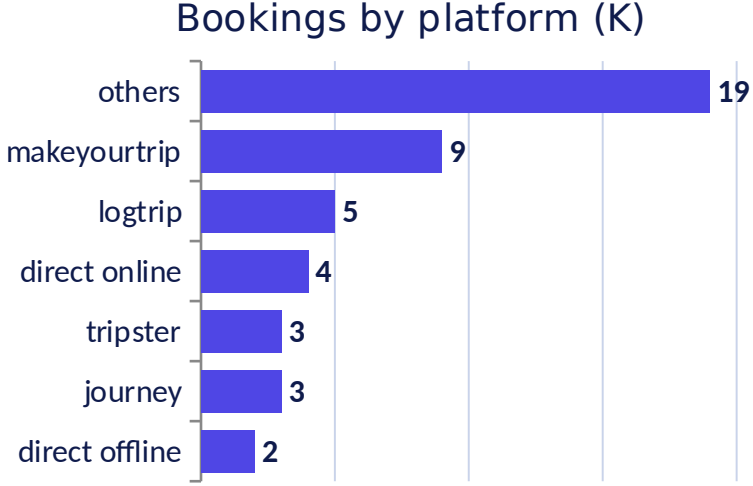

1 in 4 bookings cancelled: 24.8% (11,188 of 45,129)

Rs 99.7M LDC/PDC, about 17% of May revenue

3 months rate stuck near 25%; July best at 24.4%, LDC down 14%

Fix: deposits or non-refundable rates, reminder nudges, tighter cancel windows; track by platform

Insight 3: Who Books and When

42% "others" alone (19K of 45K bookings)

62% top two channels: others + makeyourtrip

13% direct online + offline: only 6K bookings

Grow direct bookings, and use weekday offers: weekends hold 59% of occupancy, weekdays only 41%

Insight 4: Hotel Report Card

Hotel	Revenue	Avg rating	Occupancy	Bookings	Verdict
Atliq Exotica	107M	3.64	58%	7,862	Top earner
Atliq Palace	102M	3.76	61%	n/a	Strong
Atliq City	97M	3.70	60%	7,909	Solid
Atliq Bay	87M	3.71	59%	7,121	Mid-pack
Atliq Blu	87M	3.93	63%	7,295	Quality star
Atliq Grands	**71M**	**3.09**	**53%**	**5,689**	Needs rescue

May data, six of seven properties (Seasons not visible in the screenshots)

Atliq Grands: rating 3.09 (0.5 below the next hotel), 53% occupancy, fewest bookings. Copy Atliq Blu (3.93, 63%)

All Insights at a Glance

18

#	Insight	Evidence	Action
1	**Revenue falls faster than occupancy**	Rev -12.9%, occupancy -2 pts	Check rates and room mix
2	**1 in 4 bookings cancelled**	24.8%, loss about Rs 99.7M	Deposits, reminders
3	**Mumbai carries the chain**	39% of revenue	Protect it, grow other cities
4	**Delhi may be underpriced**	Best occupancy 61%, rating 3.8, lowest revenue	Test higher rates
5	**Bangalore service gap**	Rating 3.4, occupancy 57%	Guest-experience audit
6	**Channel dependence**	Top two 62%, direct only 13%	Push direct booking
7	**Weekend skew**	59% weekend vs 41% weekday	Weekday offers
8	**Atliq Grands lags**	Rating 3.09, occupancy 53%	Rescue plan, copy Blu
9	**Empty rooms in every class**	56-59% utilisation	Dynamic pricing, upgrades
10	**July hit Bay and Blu**	-16% and -14% revenue, flat occupancy	Review July pricing

Also worth a drill-down: the weekly trend shows a dip around week 21 in May.

What This Data Cannot Tell

Market share

The problem says share is falling, but there is no competitor or market data here. We only see internal performance.

Need: competitor / market benchmarks

Why revenue dropped

Price and room mix are the likely cause, but this is a hypothesis.

Need: room rates (ADR) by class and date

Luxury vs Business

The problem focuses on this category, but no category split appears on the dashboard views.

Need: hotel category on a visual

Missing hotels

Seasons is not visible in any screenshot; Grands is missing from June and July tables.

Need: full property tables per month

What We Do Next

Actions

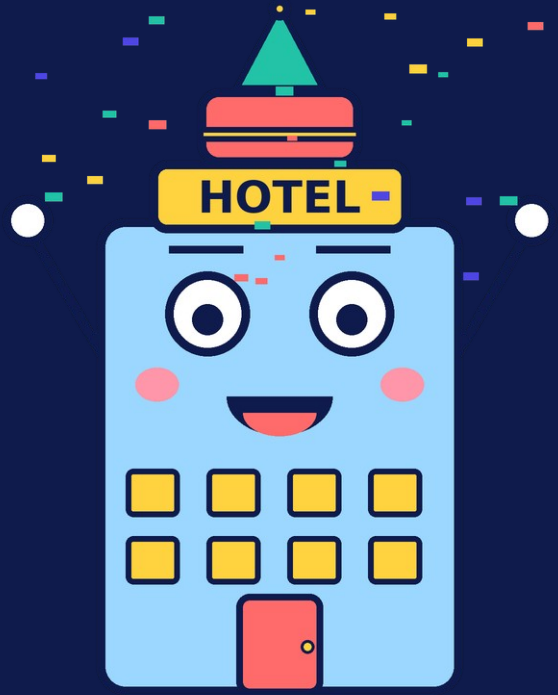

1. Rescue Atliq Grands: service audit, learn from Blu
2. Cut cancellations: deposits, non-refundable rates, reminders
3. Grow direct bookings beyond 13% share
4. Fill weekdays with corporate and midweek offers
5. Test higher rates in Delhi (best occupancy and rating)

Data we still need

1. Room rates / ADR and competitor rates
2. Cancellation reasons, lead time and refund terms
3. Commission and marketing cost per channel
4. Guest review text (why 3.09 and 3.4?)
5. 12+ months of history: seasonality and events

Data In. Decisions Out!

1. **Revenue -12.9% May to July**
   price and mix, not empty rooms
2. **1 in 4 bookings cancelled**
   about Rs 99.7M at stake
3. **Grands + direct channels**
   the biggest upside
